Introducing the PROGUARD Auto-darkening Welding Helmet.

The latest addition to CIGWELD's complete range of welding helmets is exceptional in its lightweight design, comfort and protection. With a viewing area of 100mm x 50mm and an optical class of 1/1/1/2 the PROGUARD lens is also equipped with true colour technology to increase clarity and enhance definition for the occasional and professional fabricator.

The lightweight helmet is designed for exceptional comfort, with adjustable headgear to protect from heat, sparks and spatter. The Proguard Welding Helmet is equipped with sensitivity and delay controls for seamless adjusting of settings whilst the four light sensors provide a quick auto-darkening response.

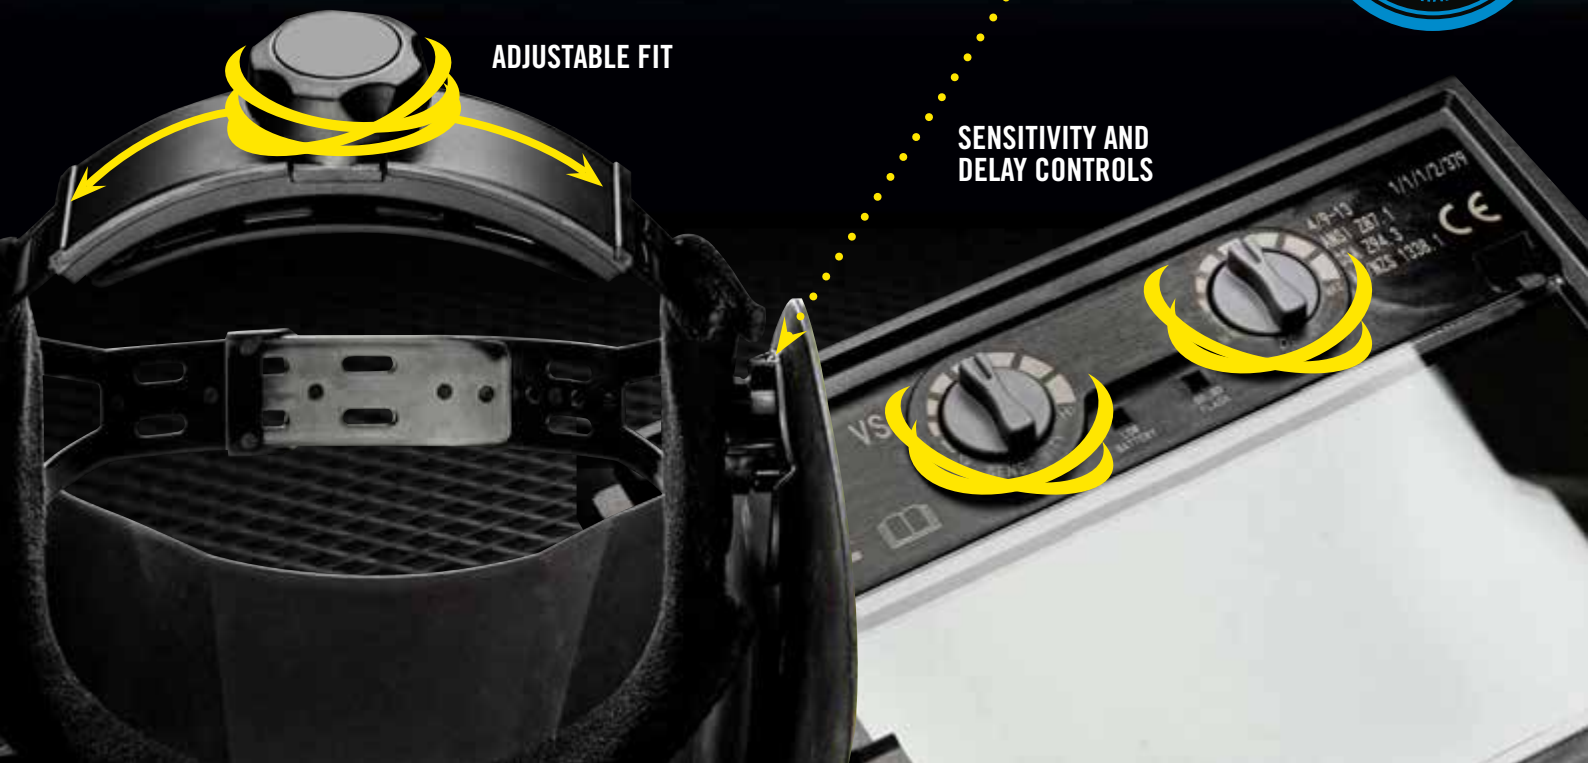

POSITIVE LOCK-UP

ADJUSTABLE FIT

SENSITIVITY AND DELAY CONTROLS

FEATURES

Auto Darkening

This welding helmet is fitted with an auto-darkening variable shade 9-13 filter lens. 1/1/1/2*

4 Sensor

Auto-Darkening filter lens is equipped with four arc sensors suitable for all welding applications including low amperage TIG.

High Impact Rating

This welding helmet complies with the high impact requirements outlined in AS/NZS 1337.1:2010*

Viewing Area

Large Viewing Area 100 x 50mm

Ultra View Lens

(True Colour Lens) with blue light filter

High Speed Reaction Time

Adjustable Sensitivity and Delay

Ergonomic Headgear

Comfortable Harness Assembly Adjust and lock positions of helmet to avoid creeping

Battery

Battery (replaceable) powered with solar assist for extended battery life. 1 x CR2450 Lithium Battery.

MIG

Ideal for all MIG Welding - including Flux Cored

TIG

TIG Rating low amperage rating of 5 amps and above DC & AC TIG Welding.

Positive Lock-Up Head Harness

Keeps your helmet securely in the up position, with an easy nod- down feature for welding.

Welding & Grinding Modes

Grind State Shade 4.

OPTIONAL

Magnification
